

Job Description

Role: Senior Python Developer

Location: Remote

Responsibilities:

- Develop scalable web applications using Python and Django/Flask.
- Design and implement RESTful APIs.
- Collaborate with frontend developers to integrate user-facing elements.
- Write reusable, testable, and efficient code.

Requirements:

- 5+ years of experience in Python development.
- Strong understanding of database systems (PostgreSQL, MySQL).
- Experience with cloud platforms (AWS, Azure) is a plus.
- Bachelor's degree in Computer Science or related field.
